SunBug Solar is an employee-owned solar installer with offices in Arlington and Westfield, MA. We design and build all types of solar systems, ranging in size from 1kW to over 1MW, including residential, commercial, carports, and ground-mounts.

Unicorr is one of the largest converters of corrugated products and protective packaging in the Northeast. Lean thinking to promote efficiency, sustainability and the elimination of waste has helped fuel Unicorr’s success. Solar was the next logical step in their sustainability journey. The 1300 panel system that SunBug designed and installed provided a win-win solution that improved the company’s environmental footprint while producing excellent returns and hedging against escalating utility costs.

“As we explored possibilities, we learned that a solar system can be a compelling investment. Given the sustainability benefits and financial returns from the project, we would have doubled the size of the array if roof load had allowed.”

Hap Perkins, President & CEO
Unicorr Packaging Group

System Details
- Located in Marlborough, MA
- Completed in March 2017
- 575 kW, 1320x SunPower 435W Panels
- 16x SMA Tripower STP 30000 Inverters
- Over 520,000 lbs CO2 avoided each year, GHG equivalent of over 26k gallons gas
