

Hillside School, Marlborough MA

Solar from the roof to the classroom.

A small school with a big heart, the independent Hillside School partnered with SunBug to develop and execute a comprehensive solar plan for the campus.

Phase one has been completed, a 140kW system on the main classroom building financed through a Power Purchase Agreement. With the PPA model, Hillside locks in long-term electricity savings and the project realizes all available federal tax credits.

In the future, Hillside will purchase the system from the civic-minded investor Chava Energy.

Not satisfied with merely installing photovoltaics, Hillside faculty worked with SunBug to integrate the array's real-world lessons about solar production and environmental impact into the curriculum. In addition to assisting with the development of course materials, SunBug designed a mobile solar lab that offers students the hands-on experience of measuring and testing photovoltaic solar cell performance.

SunBug Solar is a solar energy consulting and installation company offering solar solutions for businesses, community organizations, schools and homeowners. Our precision process includes feasibility, finance, design, construction, and commissioning, allowing our team of professionals to anticipate challenges while managing a project from start to finish.

SunBug is certified by **NABCEP**, the National Board of Certified Energy Practitioners, for photovoltaic installation and service.

We are members of the **New England Clean Energy Council**

and the **Environmental Business Council of New England**, and are accredited by the **Boston Area Better Business Bureau**. Learn more at www.sunbugssolar.com or call us at **617 500 3938**.
