Since 2009, Sunbug has provided best-in-class renewable energy solutions to a wide range of customers all over Massachusetts. Our helpful, responsive team brings deep expertise, experience, and a customer-first approach to every project. Each of us embraces a method and a mindset that's equal parts craftsmanship, collaboration, and accountability.

As a values-driven B-Corp with employee-owners, and a longtime member of the Amicus Solar Cooperative, we believe in doing the right thing, the right way, every day. Our relationships with clients, partners, and one another are guided by honesty, respect, and integrity, and we are known for standing by our work and by our word.

## Why SunBug?

Certified B corporations must meet high standards of social and environmental performance, transparency, and accountability. It's similar to Fair Trade certification, but for the whole business, not just the specific product.

Amicus is a member-owned cooperative of over 70 of the highest-quality solar integrators in the U.S. Amicus members share purchasing power to obtain lower pricing on products and services, allowing us to deliver the best value to our customers.

We certify all our residential solar systems with the Pearl Certification program that documents the high performing features of a home, developed in partnership with the Appraisal Institute, the Building Performance Institute, and the National Association of Realtors.

## Achievements

SunBug is the only solar company to be awarded the coveted Angie's List Super Service Award eleven years running.

We were awarded Boston Magazine's 2022 Best of Boston for Solar Installers, our first ever win in this category.

We hold an A+ score on the Better Business Bureau website
