Ground mounts

When you think of solar PV, you probably think of rooftop solar. While that is the most common type of installation, ground mount systems are just as viable and in many cases advantageous. Rooftop systems can pose challenges around roof orientation, pitch, roof age, shading, and structural capacity; ground mounts avoid those issues. When a roof is not suitable, a ground mount array can still offer an excellent investment return. Ground mount systems can be sized as big or as small as your demand dictates, and the panels can be oriented to perfectly capture the sun's rays.

Cummington - 14 kW

Covers 100% of customer's electric load

Granville - 13.2 kW

\$141,000 lifecycle savings

Orange - 9 kW

370,000 lbs CO2 offset

Experience Matters

SunBug has over 3,000 solar customers across MA. We are certified by NABCEP, the National Board of Certified Energy Practitioners for photovoltaic installation and service. We are members of the New England Clean Energy Council as well as the Environmental Business Council of New England.

Top Quality

We are the highest rated solar provider in Massachusetts on independent review sites such as Yelp and Angi, and is the only solar company to be awarded the coveted Angi Super Service Award eleven years running, determined exclusively from independent customer reviews.

SunBug Solar is an employee-owned solar installer serving all of Massachusetts from our Woburn and Westfield offices. We design and build all types of solar systems, ranging in size from 1kW to over 1MW, including residential, commercial, carports, and groundmounts.
